Publication date: 2011

The catalog presents a selection of the exhibition projects shown since 2008 at the Galerie Stadtpark in Krems under the direction of David Komary. The new program, which began in autumn of 2008, comprises curated exhibitions that in most cases juxtapose two different artistic positions. The catalog Coprime, as a comprehensive publication of a curatorial concept, intends to make visible those correspondences between the exhibitions and the metastructure—the program's organization, the themes running through it, and the guiding artistic concepts behind it.
